**Krify Software Technologies.** Kakinada, India

- Designed and developed applications for iOS platform using Swift and Objective-C.
- Collaborated with cross-functional teams to define and implement new features.
- Conducted code reviews and provided constructive feedback to improve code quality and maintainability.

**iOS Developer** Mar 2021 - May 2022  
**SPGON Software Solutions LLP** Rajahmundry, India

- Integrated third-party libraries and APIs to extend application functionality and improve performance.
- Participated in sprint planning, daily stand-ups, and retrospective meetings to ensure project milestones were met on time.
- Mentored junior developers, fostering a culture of continuous learning and knowledge sharing within the team.

## PROJECTS

---

**1. Timesheet** : Timesheet mobile is about preferred employee timekeeping and location tracking app for builders, contractors, healthcare, security, transportation, event planners, anyone with mobile users.

**Responsibilities :**

- Worked on Core-data storage to support app in Offline.
- Gathered user feedback for continuous improvement and implemented new features based on feedback and business needs.
- Maintaining the code and resolve the Bugs/Issues. [App Store Link](#)

**2. RepsToBeat** : Reps to Beat is a game-changing Personal Training app that provides you with tailored workout plans or permits users to develop their own plan, based on your unique fitness goals, whether you're looking to build strength, power, hypertrophy, resistance, or just overall fitness.

**Responsibilities :**

- Developed user-friendly interfaces with Auto Layouts and Storyboards, ensuring a seamless user experience.
- Collaborated effectively with cross-functional teams, including designers and backend developers, in an Agile environment.
- Maintaining the code and resolve the Bugs/Issues. [App Store Link](#)

**3. Your Moca** : A professional networking and talent hiring app for the film industry. The application provides users to find film industry jobs and provides a way to connect with filmmakers. The application also provides a way to connect with users through chat features. (Not live yet)

**Responsibilities :**

- Designed and implemented the architecture of the iOS application using MVVM pattern.
- Maintained detailed documentation and used Git for version control.
- Collaborated with cross-functional teams including designers, backend developers, and project managers to deliver a cohesive product.
- Gathered Client feedback for continuous improvement and implemented new features based on feedback and business needs.

**4. Show Off Sports** : Show off Sports is an app where users can follow athletes and their posts. Athletes can register, post about their sports, create challenges, and form squads (groups for specific sports). Fans can join fan clubs, follow squads, and use the "shout out" feature to challenge athletes by tagging them. The app also allows users to add highlights, stickers, and more to images and videos. (Not live yet)

**Responsibilities :**

- Maintained detailed documentation and used Git for version control.
- Collaborated with cross-functional teams including designers, backend developers, and project managers to deliver a cohesive product.
- Gathered Client feedback for continuous improvement and implemented new features based on feedback and business needs.

5. **Drylab** : Drylab is an easy-to-use platform for managing and sharing media files, designed by filmmakers. It lets you quickly find, organize, and download content from any device. You can share files for viewing or download without needing the recipient to log in. Drylab also uses AI to automatically tag images, making them easier to find.

**Responsibilities :**

- Collaborated with cross-functional teams including backend developer and frontend developer to deliver a cohesive product.
- Daily coordination with client regarding work status, blockages discussion and clarifying the doubts as it is a dedicated project.
- Gathered Client feedback for continuous improvement and implementing new features based on feedback and business needs.

**Apps :**

- Creator 3 (Mac Application) - which will be share .dmg file by the Drylab team.
- Viewer 3 (iOS Application) - [App Store Link](#)
- Set Report 3 (iOS Application) - [App Store Link](#)
- Screening Room (tvOS Application) - [App Store Link](#)

**EXTRA-CURRICULAR ACTIVITIES**

---

- Stay updated with new technologies and improve skills.
- Learning new languages, demonstrating commitment to personal growth and sharing with the team members.
- Writing technical blogs focused on coding within Apple's ecosystem to share knowledge and insights.
- Making Pencil Arts.

**LEADERSHIP**

---

- Set clear project goals and inspired the team to achieve them by outlining a compelling vision for the future.
- Ability to stay calm under pressure and guide the team through challenges.
